

How to Integrate Science in a Christian Worldview

We will discuss the implications and challenges this week's learning will have on our ministries and refer to previous experiences - positive and negative - we have personally had or encountered. What specific steps can we take at home? Which resources can we use and share? What would help us as scientists to be effective messengers for Christ in our context? How can we motivate more Christian scientists to participate in this process?

Alexander Fink is Director of the Institute for Faith and Science (Institut für Glaube und Wissenschaft) in Marburg, Germany (www.iguw.de). He studied physics at the universities of Bayreuth and St. Andrews (UK) and received his PhD at the Institute for Biophysics at the University of Regensburg. After having worked as an industrial product manager, he became director of SMD graduates' ministry (Akademiker-SMD, the German branch of IFES) until 2014. His passion is the dialogue of science, faith, and worldviews. Hence he founded the Kepler-Forum in Regensburg, coorganising the annual Regensburger Symposium (www.regensburger-symposium.de) at the University of Regensburg. Since 2008 he has been a member of the ELF Steering Committee and has co-led the Scientists Network. Together with his wife, Alexander enjoys raising his two children.

Peter Imming received degrees in pharmacy and chemistry and a PhD and *venia legendi* in pharmaceutical chemistry from a German university. He has been involved in drug chemistry teaching and research in Germany, the UK, China, and other countries. Currently, he is head of the pharmaceutical chemistry department of a German university. His research focuses on the design and synthesis of new drug substances and on molecular mechanisms of drug action. He has a strong interest in the relation of science and Christian faith, frequently lecturing on related topics by invitation of universities, churches, and schools.
